## HUTBE AS THE CARRIER OF THE DIVINE MESSAGE IN THE MODERN WORLD

Communication is the basic core of divine revelation as well as prophetic deliverance. The text of the proclamation and the prophetic messages are told, in order to communicate them in different forms to the human race. It is for this reason that the methodology of communicating divine and prophetic discourse has aroused particular interest in the philosophy of the Qur'anic language and the Hadith of the Prophet S.A.W.S. Also one of the major problems and defects of religious language in the contemporary world is the handicap of inadequate communication and the non-religious form of using the language of revelation and prophetic conversation.
