

## “THE USAGE AND FUNCTIONS OF ‘PASKAJORE-VERB ELABORATE’

Albanian language today recognizes five ways of elaborating a verb: do, doing, without doing, in order to do and once I do. The analytic verb usage *paskajore*-to work for example, is consider an elaborate way belonging to Gheg way of speaking. Rugova region recognizes all shapes of infinitive Gheg.

First of all dense usage of this way of speaking can be found on Gheg *paskajore* associated with prefix *me* or *e* like: *me la* (to wash), *me zan* (to catch) etc. this is typical on regions of Hoti and Kelmendi, whereas the regions of upper Shkodra it is used in two ways: a) *me urdhnue* (to order) and b) *per me punue* (in order to work)

Unmitigated forms of this kind historically are treated like intertwined with neutral gerunds such as *te lare* (my washing). Since neutral gerunds of Albanian language today are decreasing in daily use these interpretations are interpreted like unmitigated ways build on bases of prefix such as: *per te* or *me te*.

We will treat the usage of *paskajore me punue* (to work) of Gheg which in Albanian official language is substituted with *per te punuar* (in order to work) Literary we'll treat unmitigated form of *per te lare* (in order to wash) used on those particular functions: intentional, determinant etc. Random other usage of *paskajore* are those of dependent *paskajore*. Subsequently we have treated the usage of *paskajore* of all means of usage on Albanian language.
