A CROWN RELIGIOUS NOTIONS

Glossary of Mr. Qemajl Morina, is an attempt to save the transfixed face of religious terminology on dictionaries sketched during the communist regime. Works that are heavy under the ideologic dictate notorious for anti-religion. It had as a centre point of its interpretation of fundamental religion notions its ateist position towards them.

Eventhough the author is an Islamologist scholar, takes an impartial stance regarding those distortions. This is whether dealing with Islam, or Christianity, affirming some of the improvements made in recent editions of Albanian dictionary. We can say with full confidence that the *Glossary* is a precious contribution in terms of a fair knowledge and evaluation of its role in human society.
