

Dr. Fatmir XHAFERI

A NEW ENGLISH-ALBANIAN DICTIONARY

Long ago emerged from the press' English-Albanian Dictionary ", compiled by Prof. Dr. Hajri Shehu, researcher at the Institute of Linguistics and Literature.

I am pleased to say that the dictionary has high claims such as scientific lexicographical treatment, cognitive scientific value, school and teaching practice, and why not translating values.

It is interesting and significant to emphasize that the author has devoted his work to his pupils and students.

Dictionary has over 30 000 words, about 90 000 definitions and over 150 000 illustrative quotes.

Vocabulary is also for those who know much, and for those who know less. It reveals standard English and of course, standard Albanian in translation column. It helps the user to read, speak and write in English. It is the table dictionary, but at the same time, the portable one.

Finally, we think that the Dictionary gives the users also the language education, and in particular, lexicography, definitions, helps the user to recognize the English language, how to use vocabulary and especially how to use the word, what are the notes that restrict the use of a word, a meaning and etc..

Concluding my valuation, I would like to say it is indeed a dictionary to learn English in the true sense of the word. For this reason, we believe that it will be widely used.
